INTERVENTIONAL RADIOLOGISTS & STAFF

IAN DAVEY, MD
Vascular and Interventional Imaging

JOHN KNOCHEL, MD, FACR
Vascular Interventional, Body, and Women’s Imaging

NEIL C. DAVEY, MD
Vascular Interventional Imaging

VICKEN GARABEDIAN, MD
Neurointerventional and Neuro Imaging

MATT T. MOORE, MD
Vascular Interventional and Women’s Imaging

LAUREL MORGAN, NP-C
Interventional Imaging

ANTHONY P. GIAUQUE, MD
Neurointerventional, Neuro and Vascular Interventional Imaging

DALLAS PECK, MD
Neurointerventional, Neuro, and Musculoskeletal Imaging

CYLE GOODMAN, MD
Interventional Oncology and Vascular Interventional Imaging

DANIEL WEGNER, MD
Vascular and Interventional Imaging

(208) 367-6177

Gem State Radiology is the radiology group of choice for all Saint Alphonsus and Intermountain Medical Imaging locations, providing sub-specialized and professional radiology services throughout the Treasure Valley.
Interventional Radiology is a subspecialty in which both vascular and nonvascular diseases are treated by board-certified interventional radiologists who specialize in minimally invasive, targeted treatments. Each interventional radiologist is specially trained in medical imaging as well as image guidance procedures. They offer an in-depth knowledge of the least invasive treatments available, along with diagnostic and clinical experience across all specialties. Most procedures are performed with local and intravenous sedation, using image guidance that can include x-ray, fluoroscopy, ultrasound, MRI, and CT.

Many conditions that once required surgery can now be treated nonsurgically with interventional radiology. These procedures offer less risk, less pain, and less recovery time! The Interventional Radiology Clinic is available to consult and manage patients needing interventional services.

### Vascular
- Angioplasty and Vascular Stenting
- Catheter Angiography/Embolization
- Catheter-directed Vascular Thrombolysis for Deep Vein Thrombosis (DVT)
- Embolization or Sclerotherapy of Cutaneous Vascular Lesions
- Inferior Vena Cava Filter Placement and Removal

### Men’s Health
- Radium (RA-223) Xofigo for Metastatic Prostate Cancer of the Bones
- Varicocele Embolization

### Women’s Health
- Embolization for Pelvic Congestion Syndrome
- Uterine Fibroid Tumor Embolization

### Oncology
- Radioactive Bead Embolization (Y-90) for Liver Tumors
- Chemo Bead Embolization for Liver Tumors
- Microwave, Cryotherapy and Radiofrequency Ablation for Lung, Liver and Kidney Tumors
- Image Guided Needle biopsies

### Neurointerventional
- Embolization of Vascular Malformations and Fistulas
- Coiling and Cerebral Stenting for Aneurysms
- Cerebral Angiography/Carotid Artery Stenting
- Vertebroplasty

### Hepatobiliary & Renal
- Transhepatic Biliary Drainage and Stenting
- Transjugular Intrahepatic Portosystemic Shunt (TIPS)
- Ureteral Stenting and Nephrostomy

### Pain
- Vertebroplasty
- Joint, Epidural and Facet Injections
- Pain Pump and Baclofen Pump Implantation
- Spinal Cord Stimulator Device Implantation
- Radiofrequency Ablation (RFA)

### Interventional
- Pleural and Peritoneal Catheters for Fluid Collections
- Indwelling Catheter Infusion Devices
- Post Drain Placement Management
